

# COVID-19 Intelligent Detection Challenge (2022)

COVID-19 has profoundly impacted the world we live in.

The 7th IDSS (Intelligent Decision Support Systems) 2022 COVID-19 AI Detection Challenge in conjunction with the International Conference on Information Technologies and Smart Industrial Systems invites participants to help medical professionals around the world to quickly diagnose COVID-19. Participants are asked for building models to detect COVID-19 using Computed Tomography (CT) scan images and classify images into COVID-19, NON-COVID-Normal and Pathological-NON-COVID.

- June 06, 2022: Registration opens
- June 30, 2022: Registration closes.
- July 05, 2022: Release of the processed results by the task organizers.
- July 10, 2022: Submission of technical descriptions (max 4 pages).
- July 17, 2022: Result announcement among the IEEE ITSIS Conference, Paris, France.

## PARTICIPANT REGISTRATION LINK

The COVID-19 Intelligent Detection Challenge is hosted on the Kaggle competition platform ([CHALLENGE AND COMPETITION - ITSIS 2022](#)).

## ORGANIZERS

- Mounir Ben Ayed, University of Sfax
- Boudour Ammar, University of Sfax
- Maha Charfeddine, University of Sfax
- Ghada Feki, University of Sfax
- Rahma Fourati, University of Sfax
